A warm welcome to Canva Docs

We're very excited to have you here! We hope you enjoy using Canva to create beautiful documents.

Here are six features we think you'll love:

1. Meet the + button

With our handy **+** button, you can easily add anything to your page - checklists, charts, graphics, and more!

For desktop users, just click on the page, and it will pop up on the left-hand side. It looks like this:

Or, **if you're on mobile**, simply tap on the doc and use the magnifying glass at the bottom of the screen.

✏ **Try it now!**

Click on the white space below, use the **+** or button to bring up the menu, and select any item to add it to your page.

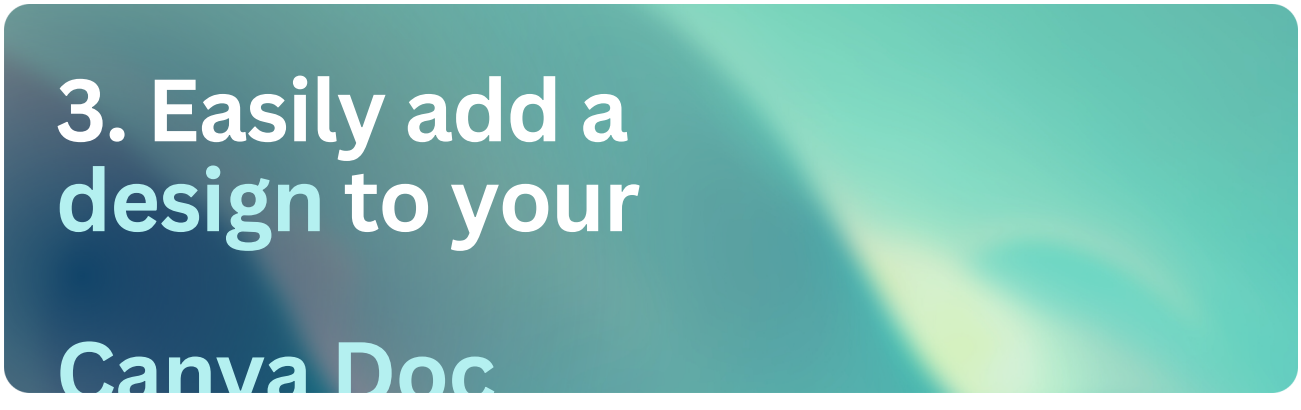
2. Try out Magic Write ✨

Kickstart your ideas with the help of Canva's Magic Write. Magic Write uses the power of AI to follow your instructions and generate original copy from scratch. The more specific your request, the better the results. Here are a few ideas:

- Write a heartfelt poem about unsung heroes
- Write a children's story about a rainbow and a cloud
- Write a social media strategy for healthy cupcakes

✏ **Try it now!**

Click the **+** button on desktop, or on mobile, select 'Magic Write', and type your request (only available in 18 locales and not available for students).



You can create and edit designs without leaving the page. This is super helpful if you want to include a graphic banner (like the one above) or some visuals in your Doc.

✏ **Try it now!**

Click the **+** button on desktop, or on mobile, and select **'Design'**. Design away, then click **Save**.

4. Embed your Canva designs

Embed other Canva designs and documents by copying and pasting the project link. Or just drag and drop them in!

✏ **Try it now!**

Here's a Canva Presentation we've embedded. You can double-click on it to interact, and click through the pages. Now try copy and pasting your own Canva link below:

5. A bit of emoji fun

Write a word after a colon **:like this** to search for an emoji via desktop. For example, **:party** = 🥳. Here are some other words you could try:

:surprise = 😲	:peace = ✌	:thanks =	:pizza =
:hamburger =	:laugh = 😂	:100 =	:pasta =
:rainbow =	:sunflower =	:thumb =	:smile = 😁

✏ **Try it now!**

Type out **:star** below, and see what you get

On mobile, simply search for emojis via your keyboard library.

6. Invite your team to collaborate

Simply click the **Share** button at the top of the page, and invite anyone to join your Canva Doc. You can also share feedback with your team with **comments**.

✏ **Try it now:**

1. **Highlight this line of text**
2. Click the **comment bubble** that appears on the right-hand side of your doc
3. Click to add your feedback, and tag your teammate with @theirname

Ta da! No more endless email chains.

Infinite fun!

With Canva Docs, creativity never ends. Your page will keep going as long as you keep writing. We hope you love the experience as much as we've loved making it. Happy Doc designing!
